## Transforming Rural Health Together

Is your state leading vital new work funded by the Rural Health Transformation Program? [Our organization is here to help.](#) Our experts live and work in rural areas, have decades of experience improving rural health and behavioral health, and understand rural communities' many strengths and unique challenges.

Our services include:

- [Planning support](#) that engages rural residents, providers, and partners in shaping priorities, effective program models, and successful implementation plans
- [Digital tools](#) that extend providers' reach, promote preventive care, and support disease management
- [Training](#) for preventive, primary, perinatal, and behavioral care providers, leaders, and administrators
- [Collaborative improvement and innovation networks](#) that build teams' capacity to use data to increase efficiencies and improve systems, services, and patient outcomes
- [Coaching](#) to launch and sustain partnerships, streamline operations, increase coordination of care, and successfully implement new service models
- [Needs assessments](#) of health care systems and services; workforce capacity, distribution, and retention; and barriers to health care access by population and place

### Results-driven, impactful services:

We tailor our services to meet communities' needs and draw on proven methods to support planning, fuel action, and sustain improvements

We help clients tap the power of technology, evidence, and data dashboarding to transform rural health systems, services, and training

We offer rigorous evaluation services to help states track progress, refine strategies, and show they are meeting their goals to improve health and wellness

## We Can Help Your State Strengthen:

### The Clinical Workforce

EDC designs and delivers [award-winning](#) digital health learning solutions. Our evidence-based, cost-efficient, effective on-the-job learning ensures all providers fully meet patients' needs. We also produce digital tools that providers can use to support patient well-being between visits.

### Maternal and Child Health Care

EDC's successful strategies and strong track record of [transforming home visiting](#), [community birth](#), and all [perinatal services](#) ensure mothers, infants, children, and families in rural communities thrive. We build capacity to use continuous improvement, cross-sector collaboration, and data to drive and sustain change long after we are gone.

### Behavioral Health

EDC's leadership in [suicide prevention and substance misuse prevention](#), including Zero Suicide, helps states and rural health care organizations dramatically improve behavioral health outcomes. Our team brings proven and innovative solutions. View our [PTSD](#) and [VetChange](#) tools.

### Health Systems

EDC's expert systems change consultants and experienced evaluation team guides state and community health care leaders in planning, implementing, assessing, and sustaining improvements. We specialize in facilitating collaboration, coordination, and communication to advance shared goals to strengthen services and systems.
