

Help Inform STEM Activities for Teen and Young Adult Patients

Participate in a Paid Research Study

MakerMEd is a National Science Foundation funded project that will be developing science, technology, engineering, and mathematics (STEM) activities for teens who spend extended time in hospitals or other healthcare facilities.

We're looking to talk to the child life specialists and administrators who support teens over extended hospital stays. Interviews will take place over Zoom and be scheduled at your convenience through February 2026. Use the link or QR code below to learn more and to complete an interest form. MakerMEd will then get in touch!

Child Life Specialist

- You see patients ages 12 to 24
- You create or facilitate therapeutic activities for the patients you support

Child Life Admin

- You oversee staff who provide therapeutic and recreational programs
